Issues in teaching

EBHC to students

Potential threat to senior practitioners

- Breakdown of traditional hierarchy
- Unfamiliarity with EBHC

- Organisational:
 time, IT access, dispersed placements
 'power gaps'
- Personal:
 - lack of knowledge +/- interest perceived lack of relevance
 Sign posting the future in EBHC

Organisational:

administration

junior staff

e-aids

clear tasks

team approach

Skills mix

Clinical tutor vs. EBHC tutor

Conclusion:

In an ideal world, all practitioners would be skilled in EBHC and demonstrate this explicitly to all students as an integral part of early clinical training. When this is not possible, qualified individuals should be found to act as a bridge by providing EBHC support for other teaching colleagues.
