

Curriculum Working Group

Trial

- Randomized controlled trial of EBHC
- Randomize health care professionals to receive training in EBHC
- Does it affect patient outcome
- Send for ethical approval

Curriculum

- Why
 - There are many people ‘teaching EB’
 - There are many people ‘practicing EB’
 - EB is used by managers and politicians to change practice without all steps.

Drawing a line in the sand

- Either write a series of articles in JAMA
 - Why?
- Write a statement saying we think it is this
- We represent (with others who could not attend) the core of EBM process in the world

EB Curriculum

Forms the Sicily Statement

- Definition
- 5 (6) steps
- Pedagogically sound
- Sent serially round a steering committee
- Sent to all Sicily attendees
- Sent to BMJ
