Accessing the National Collaborating Centre for Methods and Tools’ capacity building resources remotely: Supporting the development of evidence-informed practice skills in low resource settings

Maureen Dobbins, RN, PhD, Claire Howarth, MPH, Kristin Read, MPH
The National Collaborating Centre for Methods and Tools, School of Nursing, McMaster University, Hamilton, ON, Canada

The National Collaborating Centre for Methods and Tools (NCCMT) champions the use of evidence in public health decision making. We are one of six National Collaborating Centres in Canada, funded by the Public Health Agency of Canada. The NCCMT supports public health organizations and practitioners by compiling and sharing knowledge and high quality resources on what works in public health, as well as providing training and mentorship in evidence-informed decision making (EIDM). Our goal is to facilitate optimal health and wellbeing for all Canadians by ensuring public health professionals are equipped with the knowledge and skills to implement the most effective and cost-efficient programs and services.

Aim
The NCCMT created an offline version of our website to increase the accessibility of the NCCMT’s online resources in settings with low internet connectivity.

Results
• Offline resources available on a USB
• USBs available upon request at no cost
• USBs have been distributed to organizations in northern Canada

What is Included
• User guide
• Available in English and French
• Included resources:
  • Learning Centre
  • 13 Online Learning Modules
  • EIDM Skills Assessment
  • Videos
  • Understanding Research Evidence
  • Perspectives on Evidence-Informed Public Health
  • Introduction to NCCMT
  • Rapid Review Guidebook
  • Registry of Methods and Tools
  • Publications page

Development Process
• Consultation with community partners
• Web developer adapted the website for offline use
• NCCMT staff tested content to ensure that all offline website features were functional
• Feedback centered around dissemination strategies and content.

Limitations
• Does not include Health Evidence™
• All content is current to October 2018 when the offline version of the website was created
• Cannot access links to external websites
• Cannot download certificates for Online Learning Modules
• NCCMT cannot collect details on frequency of use of the resources

Conclusions
Providing access to the NCCMT’s resources in an offline format increases the accessibility of training and capacity development opportunities for EIDM in areas where there is limited internet connectivity.

Next Steps
Develop a targeted dissemination strategy to share USBs with interested users.

Contact Information
Interested in receiving the offline website on USB? Contact Claire Howarth, NCCMT Research Coordinator at Howarthc@mcmaster.ca.
