SAFOBAD
A generic, internal validity assessment tool for light touch, evidence-based practice
Prof. Kevork Hopayian, University of Nicosia, Cyprus.

Need a generic tool for internal validity: to teach basic EBHC and for easy use by non-experts

Criteria
Tool must...
• Be simple
• Connect teaching & practice
• Apply to all quantitative studies
• Be memorable

Before data collection
Selection
Allocation

During data collection
Follow-up
Outcome
Blinding
Analysis
Discussion

After data collection
Selection
Allocation

Scrubinise All Facets Otherwise Bias Avoids Detection

<table>
